# Case Study of Five Websites

## Introduction

This case study analyzes five different websites from distinct domains: Educational, Healthcare, E-commerce, Agriculture, and Automobile. The objective is to study and compare these websites based on parameters such as website speed, theme alignment, navigation, images, content & data organization, color scheme, fonts, technologies/algorithms used, and overall usability.

The analysis helps understand how website design and technology impact user experience and effectiveness.

## 1. Educational Website

**Website Selected: https://www.coursera.org**

**Purpose of Website**

To provide online courses, certifications, and degree programs in collaboration with universities and companies.

**Website Speed**

- Moderate loading speed
- Slight delay due to videos and dynamic content

**Theme Alignment**

- Professional and academic
- Focused on skill development and career growth

**Navigation**

- Well-organized categories
- Search and filters improve user experience

**Images & Media**

- Course thumbnails and instructor images
- Clear separation of syllabus, reviews, and pricing

**Content & Data Arrangement**

- Course-wise structured layout
- User progress data well integrated

**Colors**

- White background with blue accents
- Professional and calm appearance

**Fonts**

- Clean sans-serif fonts
- Easy to read for long sessions

**Technology / Algorithms Used**

- Recommendation algorithms
- Progress tracking and personalized suggestions

**Developer**

- Coursera Inc.

**Likes**

- High-quality learning content
- Industry-recognized certifications

**Dislikes**

- Many courses are paid

**Overall Evaluation**

Very Good

## 2. Healthcare Website

**Website Selected:** https://www.apollohospitals.com

**Purpose of Website**

To provide hospital information, doctor appointments, and healthcare services.

**Website Speed**

- Good Speed
- Slight delay due to banners and animations

**Theme Alignment**

- Purely informational and medical
- Trust-oriented and professional medical theme

**Navigation**

- Easy appointment booking
- Well-optimized media

**Images & Media**

- Doctor profiles and hospital images
- Focus entirely on text-based medical data

**Content & Data Arrangement**

- Organized by services, specialties, and locations

**Colors**

- White and green
- Represents health and trust

**Fonts**

- Professional and readable fonts

**Technology / Algorithms Used**

- Appointment scheduling system
- Patient data management

**Developer**

- Apollo Hospitals Enterprise Ltd.

**Likes**

- User-friendly appointment booking
- Reliable healthcare information

**Dislikes**

- Slightly complex for first-time users

**Overall Evaluation**

Good (Content-focused)

## 3. E-commerce Website

**Website Selected:** https://www.amazon.in

**Purpose of Website**

To sell a wide range of products online.

**Website Speed**

- Fast and optimized
- Performs well even on low bandwidth

**Theme Alignment**

- Commercial and user-centric

**Navigation**

- Excellent navigation
- Advanced search and filters

**Images & Media**

- High-quality product images
- Multiple views available

**Content & Data Arrangement**

- Product details, reviews, and recommendations well structured

**Colors**

- White with orange and black accents

**Fonts**

- Simple and readable fonts

**Technology / Algorithms Used**

- Recommendation engine
- Inventory and cart management algorithms

**Developer**

- Amazon Inc.

**Likes**

- Easy shopping experience

**Dislikes**

- Too many ads and suggestions

**Overall Evaluation**

Very Good (Design-driven)

## 4. Government Services Website

**Website Selected:** https://www.india.gov.in

**Purpose of Website**

To provide government services and information to citizens.

**Website Speed**

- Moderate
- Depends On Server Load

**Theme Alignment**

- Informational and official

**Navigation**

- Category-Based navigation
- Requires effort to locate specific services

**Images & Media**

- limited use of images
- Mostly text-based

**Content & Data Arrangement**

- Information rich but legthy pages

**Colors**

- Government Standard colors (blue/white)

**Fonts**

- Basic web-safe fonts

**Technology / Algorithms Used**

- Government CMS
- No  personalization

**Developer**

- Government of India

**Likes**

- Authentic and official information

**Dislikes**

- Outdated UI
- Complex navigation

**Overall Evaluation**

Average

## 5. Travel Website

**Website Selected:** https://www.makemytrip.com

**Purpose of Website**

To book flights, hotels, trains, and holiday packages.

**Website Speed**

- Good
- Slight delay to dynamic pricing updates

**Theme Alignment**

- Travel and leisure focused

**Navigation**

- Smooth booking flow
- Well-designed user journey

**Images & Media**

- Destination and hotel images
- Enhances user interest

**Content & Data Arrangement**

- Step-by-step booking process
- Clear pricing and options

**Colors**

- Blue and white
- Fresh and travel-friendly

**Fonts**

- Modern and readable fonts

**Technology / Algorithms Used**

- Price comparison algorithms
- Real-time availability system

**Developer**

- MakeMyTrip Ltd.

**Likes**

- Easy bokking
- Multiple travel option

**Dislikes**

- Prices change frequently

**Overall Evaluation**

Good

## Comparative Table

| Sr No | Website URL | Purpose | Things Liked | Things Disliked | Overall Evaluation |
|---|---|---|---|---|---|
| 1 | coursera.org | Education | Quality Content | Paid Courses | Very Good |
| 2 | apollohospitals.com | Healthcare | Easy Booking | Slight Complexity | Good |
| 3 | amazon.in | E-commerce | Fast and reliable | To many ads | Very Good |
| 4 | india.gov.in | Government | Authentic info | Poor UI | Average |
| 5 | makemytrip.com | Travel | Smooth Booking | Price fluctuation | Good |

## Conclusion

This case study highlights that private and commercial websites focus heavily on **user experience, speed, and personalization**, while government websites prioritize **information accuracy over design**. A balanced approach between performance, usability, and content results in an effective website.
